# Cycling

The biking was fantastic and our main form of transportation. Completely bike friendly throughout the entire area as drivers were very accommodating for bikers. Mainly flat paths (alongside canals or through the countryside) linked surrounding towns. In the city of Groningen, bikes were the dominant form of transportation. Getting used to the strong winds were a challenge, but the "granny" bikes were very comfortable, making the ride easier.

# Monuments Day Windmill Tours! Poldermolen Zuidwendinger

Polder mills remove water from the ground to make the land useable for living and farming. See the video on the next page to see the auger in action.

## Woldzigt Molen – Rotowolde

This large industrial mill produces flour and linseed oil. It was quite impressive to stand on the platform and hear/feel the blades turning in the wind!
